

ARTSY ANIMALS JUNGLE/RAINFOREST WORKBOOK 5

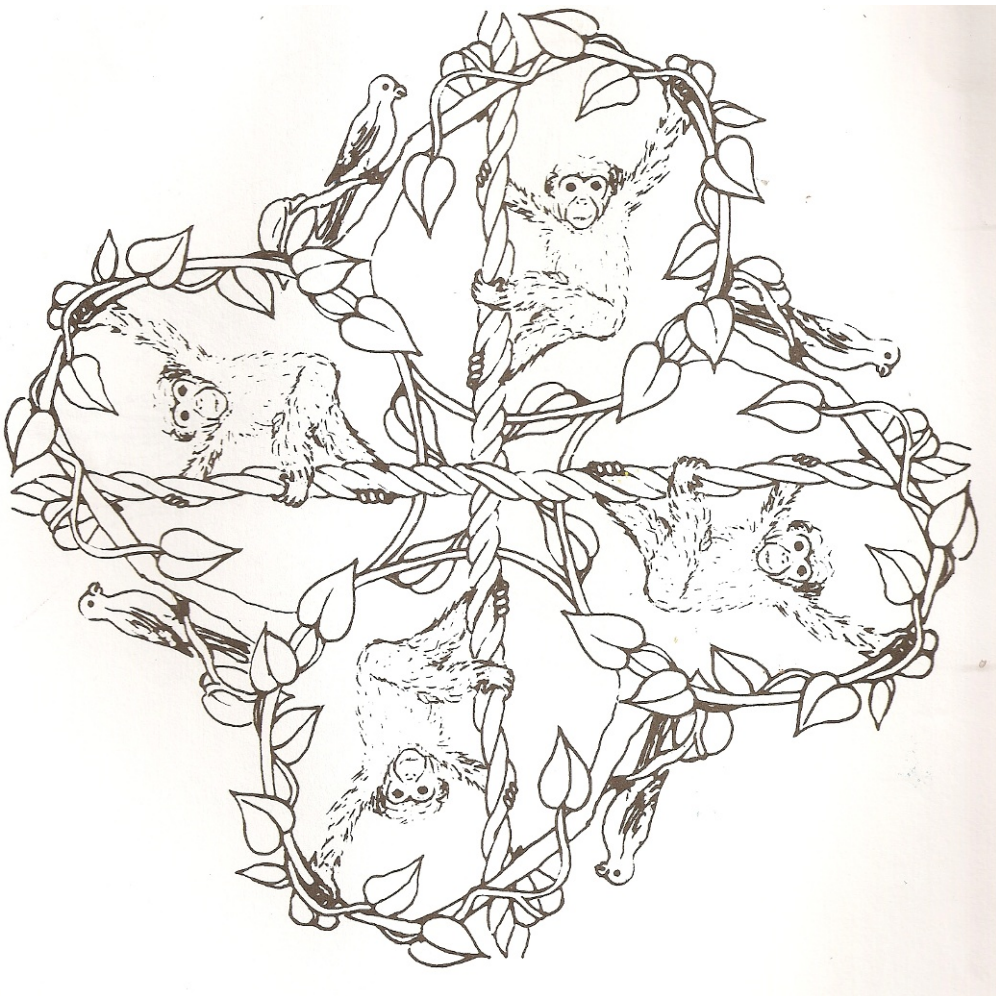

Apes are also seen in the rainforest. Look at the first two letters in the words anaconda, agouti, and adoring. Say these words slowly. These have a short A sound. Ape has a long A sound. Color the anaconda green. green-verde

A

The picture below has symmetry. Color the picture below. Create a similar picture using an anaconda.

There are apes in the rainforest.

Hay monos en la selva.

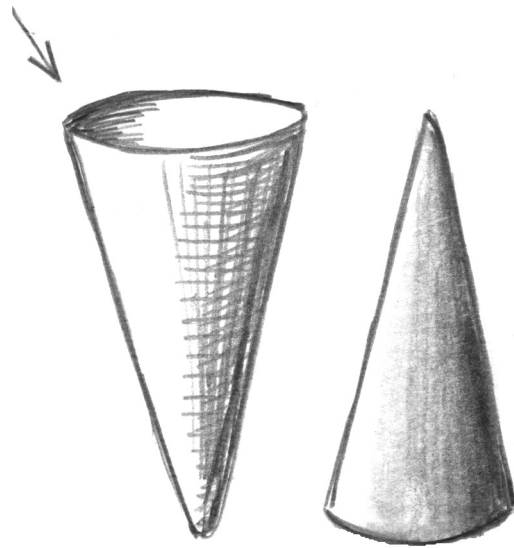

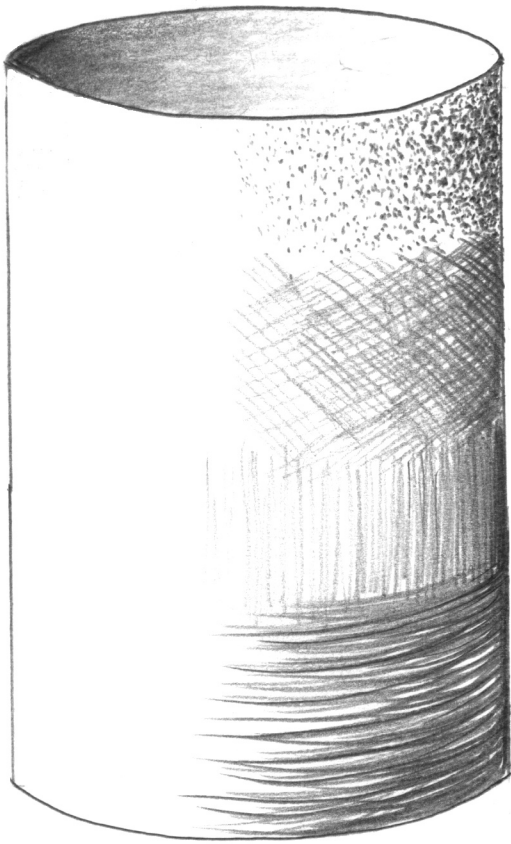

Can you see any letters in the shape of the bat below?
Sometimes when I draw a bat, I think of the letter "W."
Do you think the ears look somewhat like an upside down
"W?" Go to this website to draw a bat:
<http://www.dragoart.com/tuts/pics/9/2609/11364/how-to-draw-a-cartoon-bat-step-11.jpg>

B

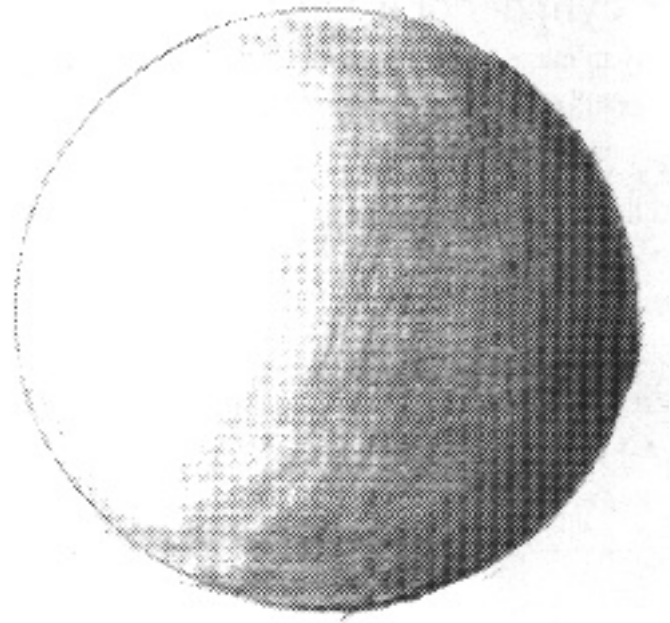

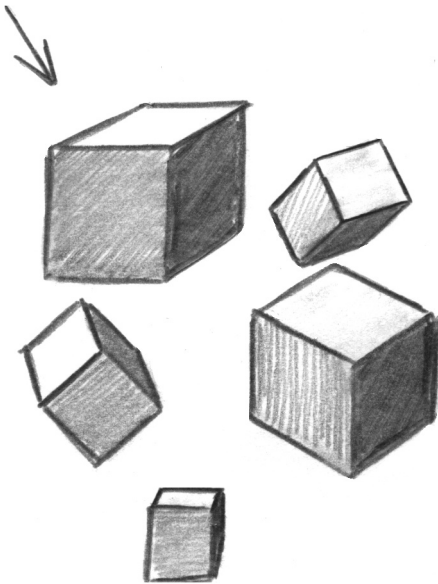

The **bat** was in a cave and was black.
El **murciélago** estaba en una cueva y era negro.

In art, the black is negative space and the space the bat is in is positive space. Draw a bat first on black paper in a cave. Be sure to use light colors so there is contrast. If you draw your bat on black paper with a black crayon, there is no contrast. Draw your bat on white paper. If a bat flew out of the cave, what do you suppose would be the first thing he might land on?

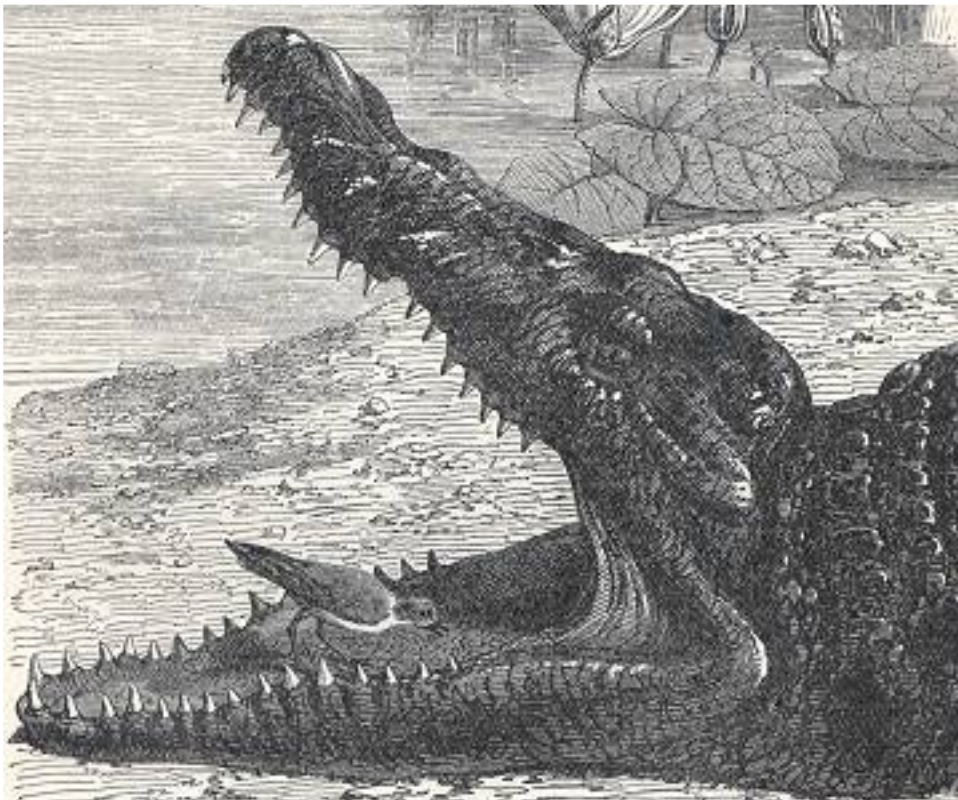

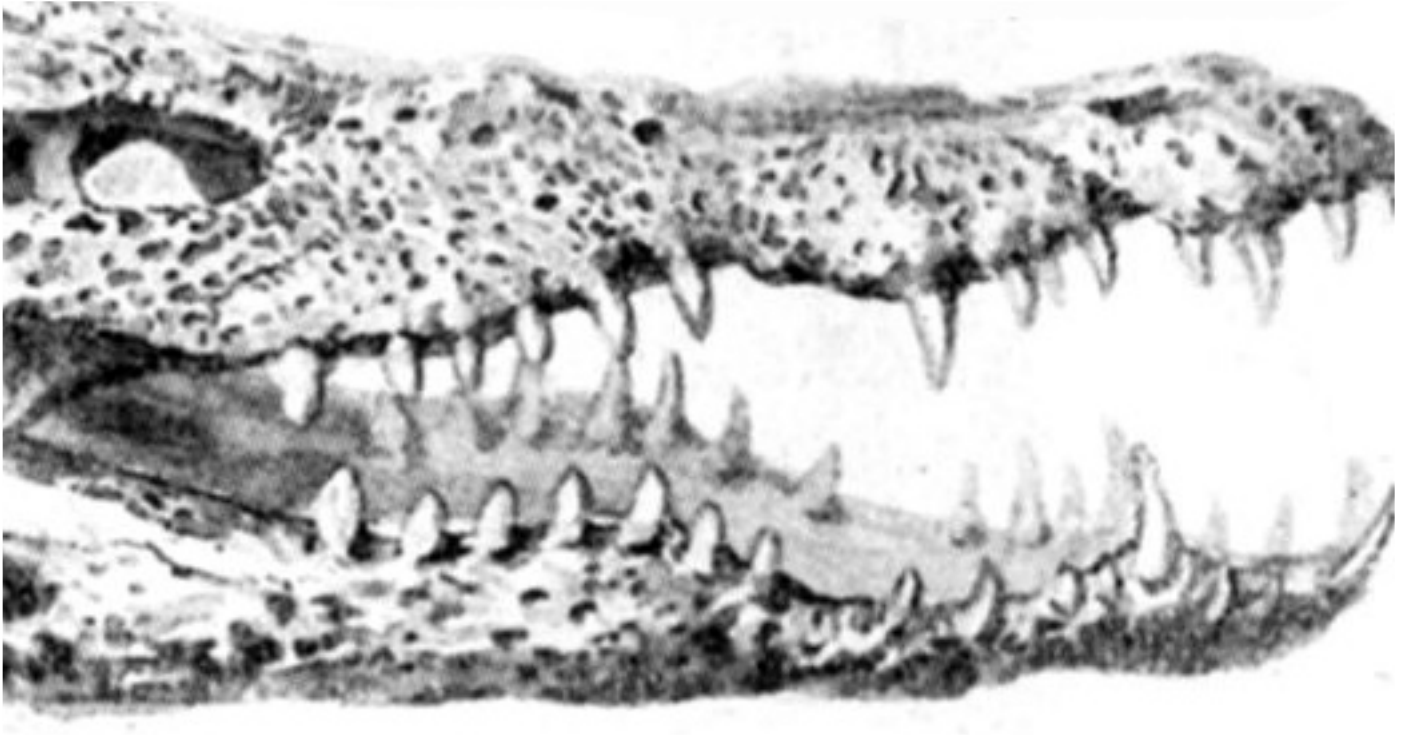

In Spanish, cone is pronounced with an "o" on the end. The word is cono.

When you draw anything in art, look for the basic shapes and then find where your light source is coming from. Use shading, shadow and texture to make your picture look real.

Can you draw the jaw of this crocodile? Teeth are cones that are shaded. Do you see the light and dark values on the bones and skin of the crocodile?

C

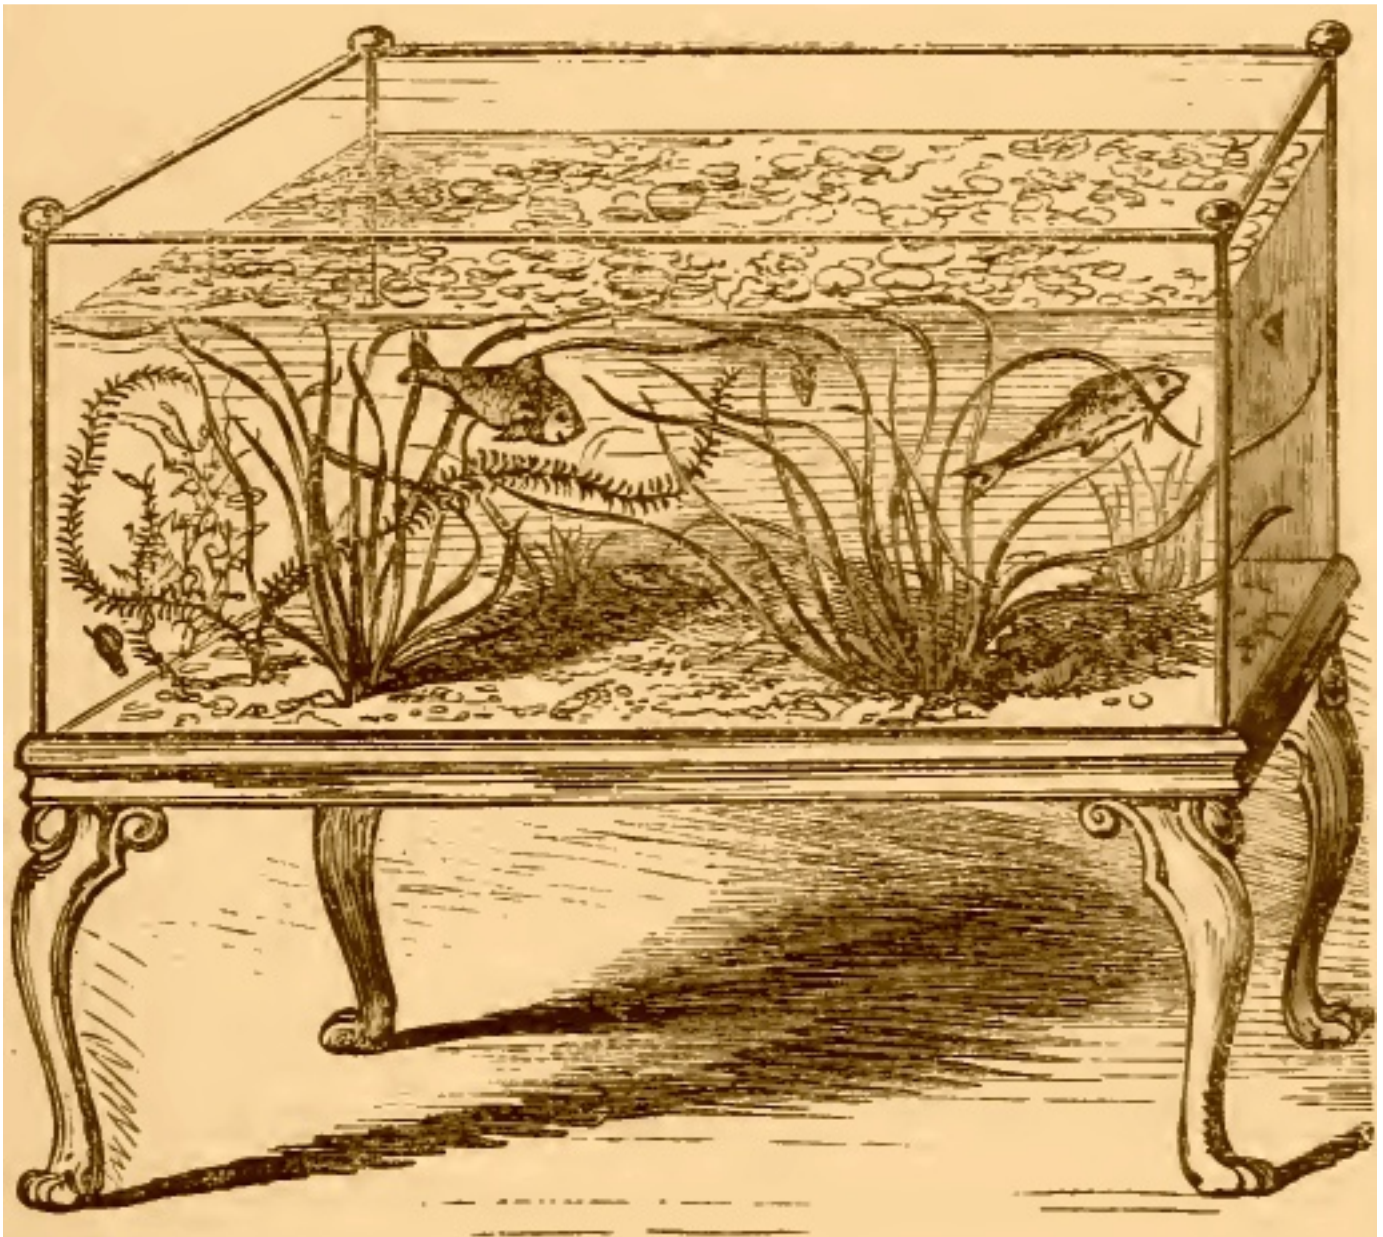

Draw a crocodile's mouth wide open and put something in the mouth.

You could find a diamond tetra and a chocolate doradid in an aquarium. My neighbor has his own ocean aquarium. Do you think the aquarium below is a good place to put fish? Do you think it might look like their natural habitat? What are some things you could put in an aquarium from a creek or river near you?

D

This aquarium above is from 1856.

There were no cameras to take pictures of things when this picture was made. Do you see a filter on this aquarium? What do you think might be on the top of it? Design an aquarium that might have been seen in the movie "Voyage to the Bottom of the Sea." Go to this website to read about it:

http://en.wikipedia.org/wiki/Voyage_to_the_Bottom_of_the_Sea

Do you know this is what an eel farm looks like?

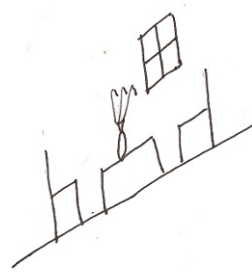

How many words can you think of that rhyme with eel? Write these words down and make a story about an eel using them. How many words can you think of that rhyme with farm?

Write them down and create a story using them.

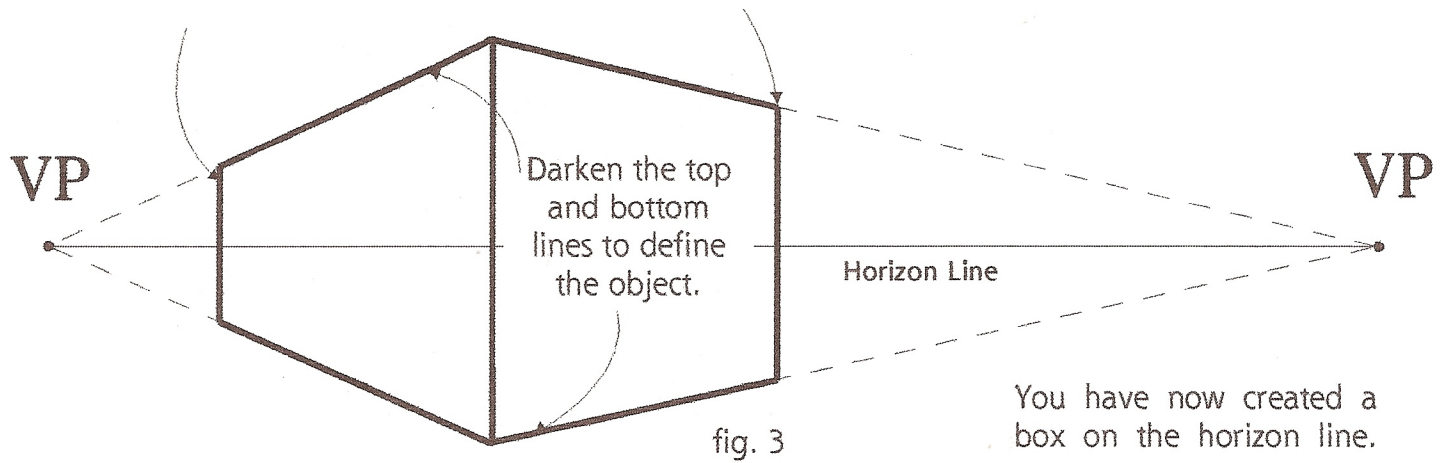

Sample sentence: I saw an eel feel a vegetable meal and make a deal with a seal to not eat it.

Create a room that is slanted like the one the eel is in in the picture.

E

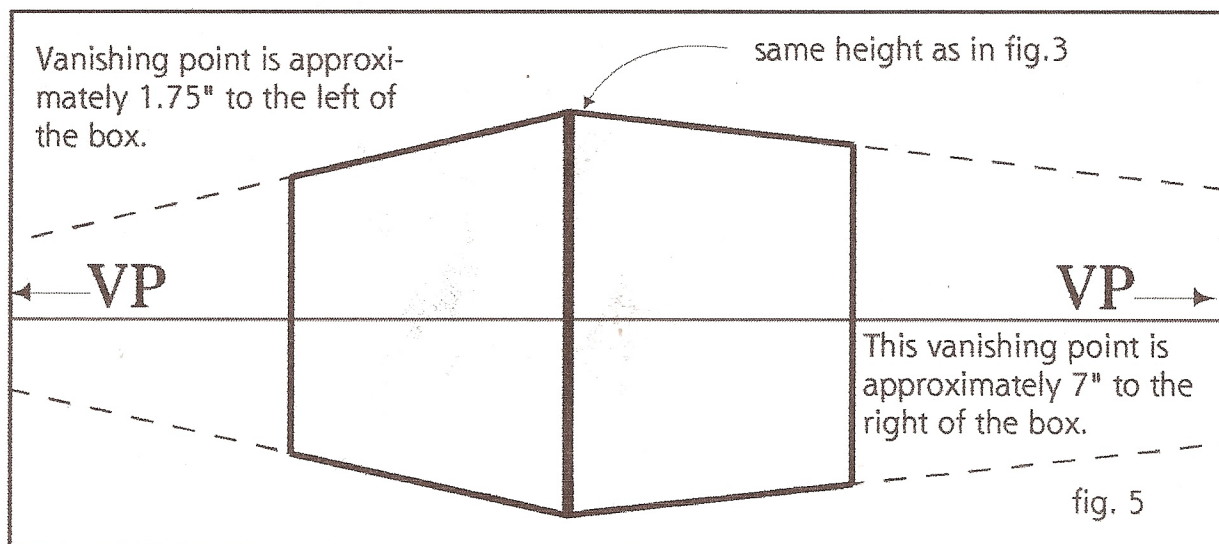

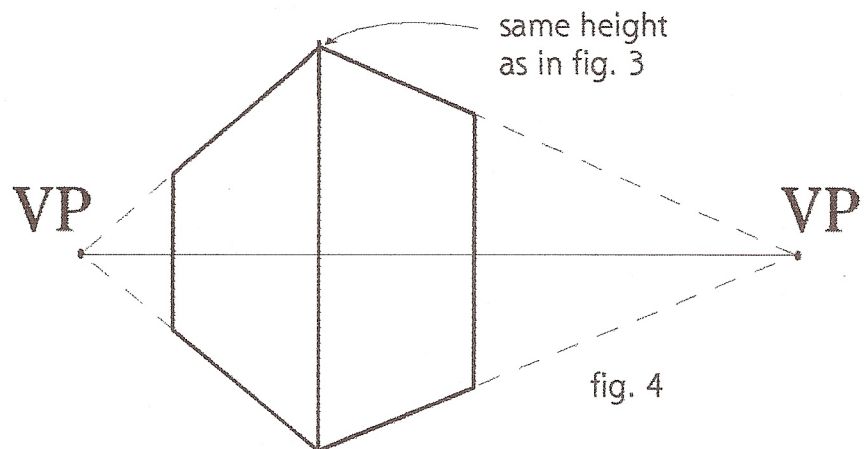

In the last picture we would need to know some linear perspective to draw the eel farm.
Follow directions below and make the picture of the eel farm.

You should notice that if you move the vanishing points farther apart or closer together you can change the perspective dramatically.

Fig.4 has a shorten horizon line with the same height and fig.5 has an elongated horizon line with the VP off of the page.

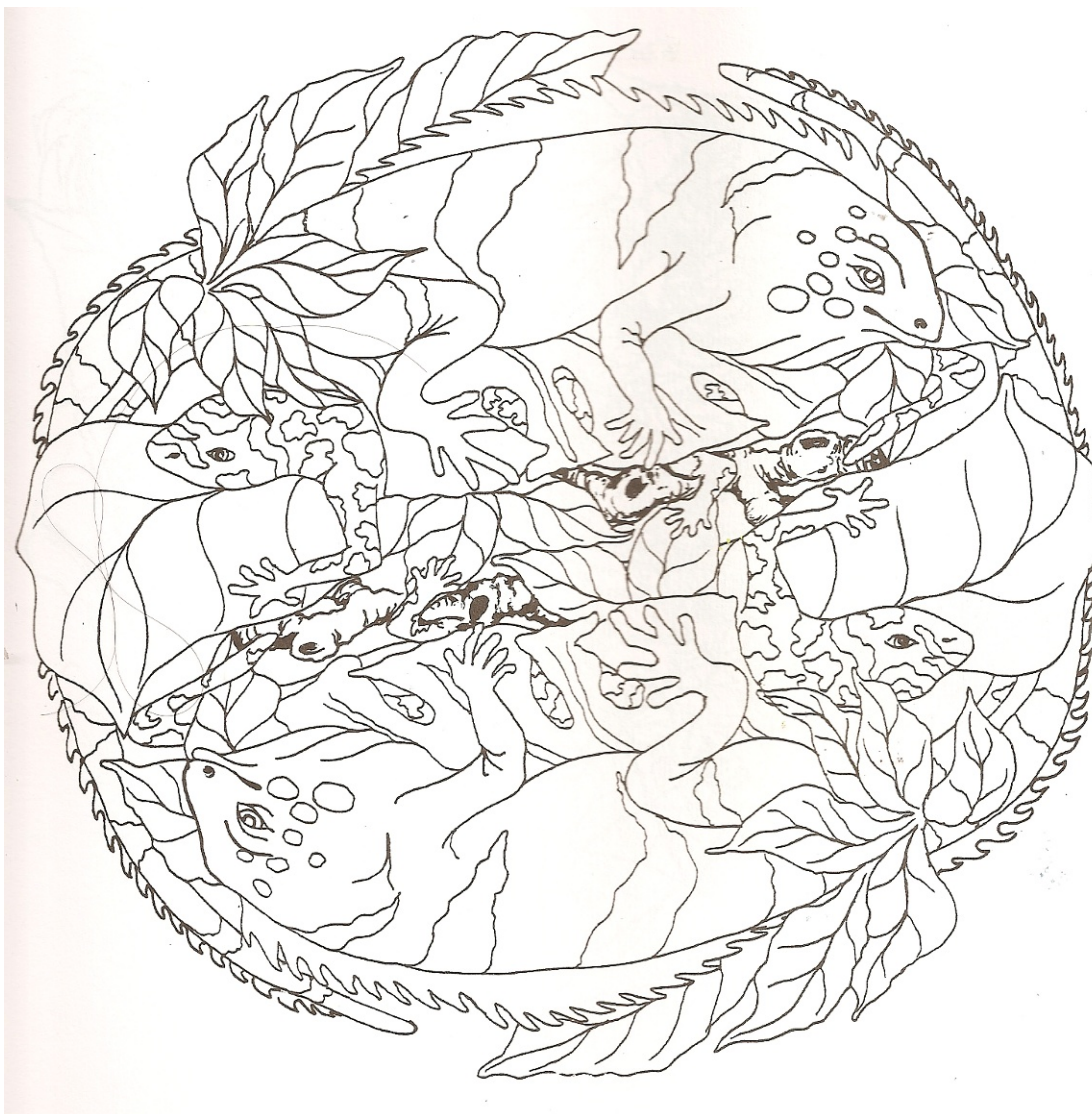

What might a flame fish look like? Use red and orange oil pastels and create a flame fish that looks like it is on fire.

F

There is a green iguana in the picture below. Do you see it? What other animals do you see that might be found in the rainforest? See how many different shades of green you can put in the picture below: blue green, yellow green, chartreuse, pine green, mint green, etc

G

Henri Rousseau was a famous artist who did many jungle pictures. He did the two monkeys on the left. What do you like about this picture? Do a picture of the two monkeys below in the jungle.

The Harpy Eagle was named after the creature on the left in mythology. The sound that the eagle makes sounds like "keeeyar"

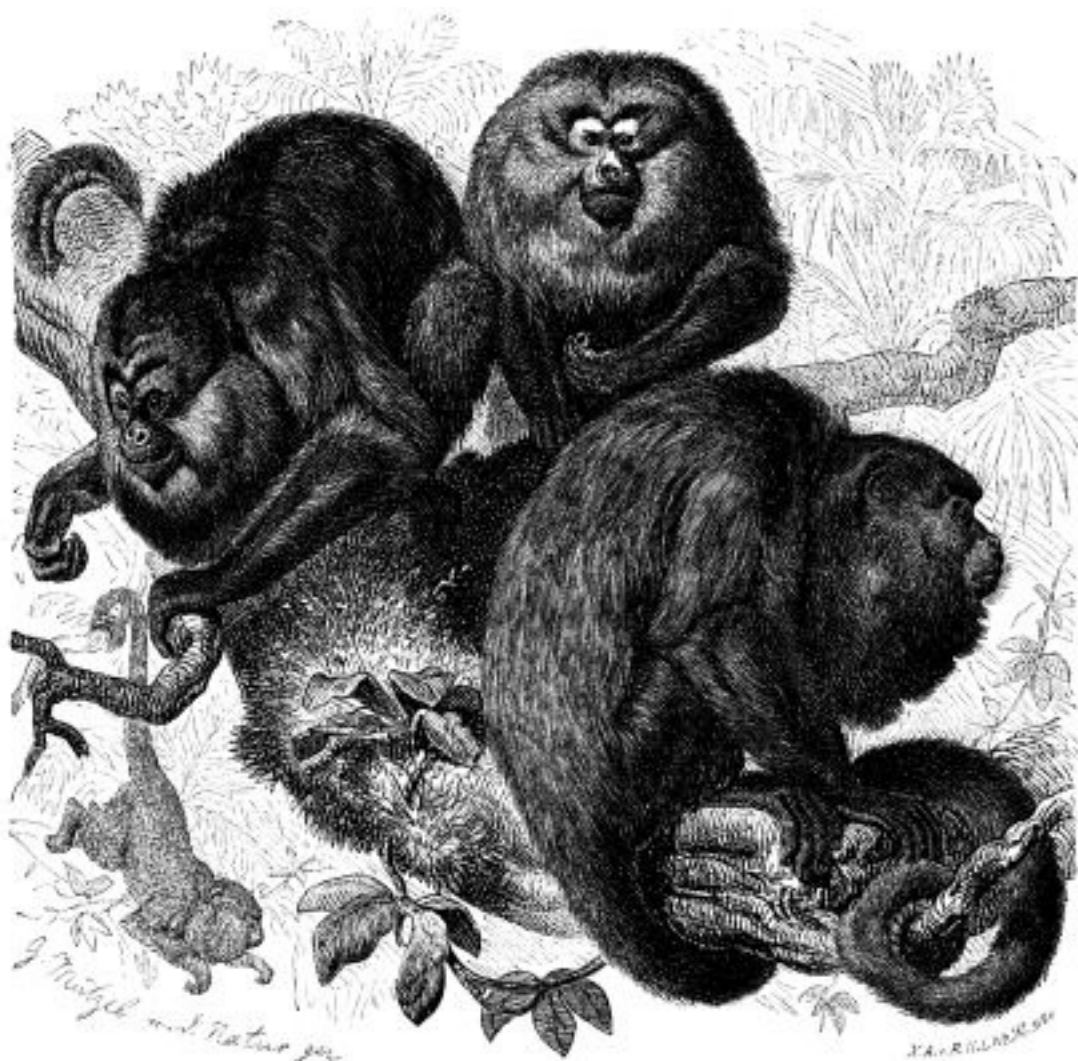

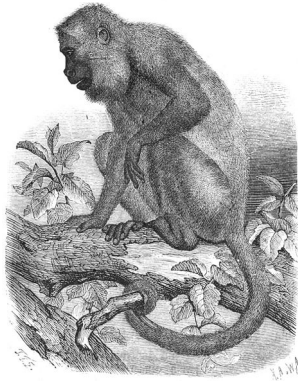

H

On the left is a pencil drawing that shows texture. Practice making feathers.

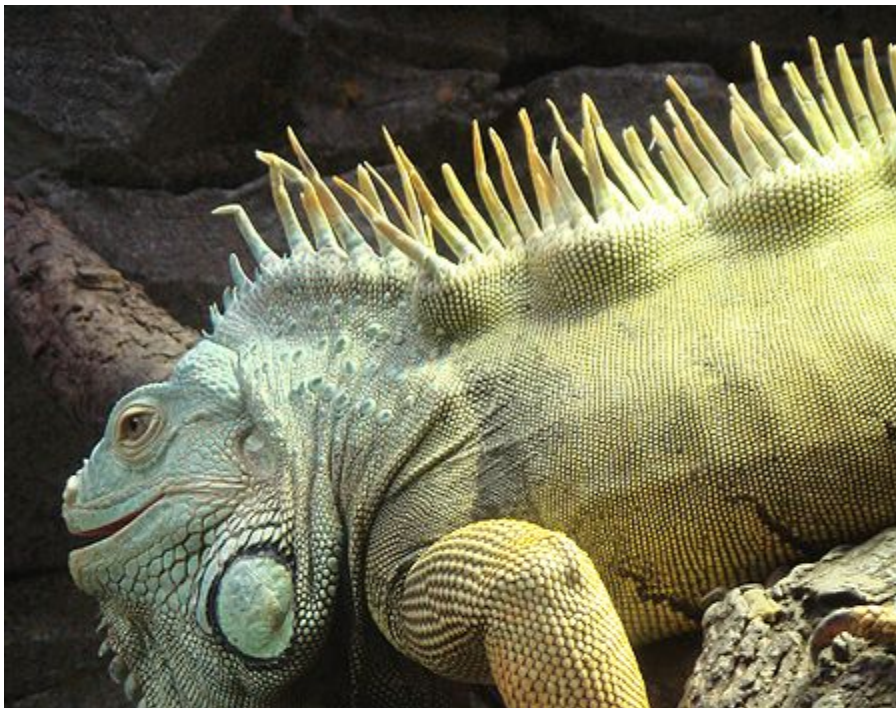

You can go to this site and hear a howler monkey howl:
http://commons.wikimedia.org/wiki/File:Mantled_Howler_howling.ogg
Practice making different values of dark and light with your pencil. Make three howler monkeys or three Harpy Eagles setting in a tree.

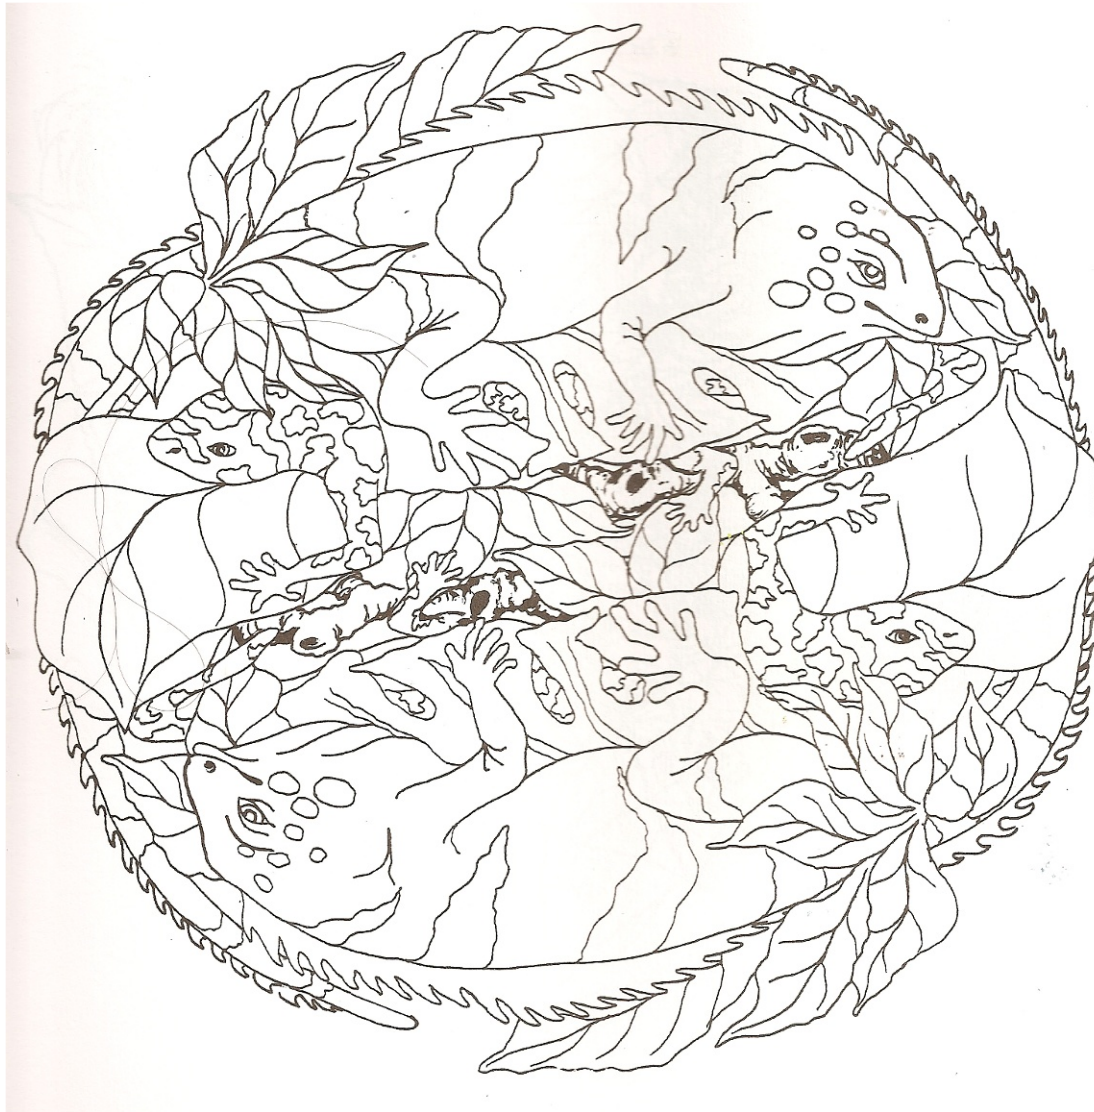

Do you think this iguana looks like a dinosaur?

Look at the texture of his skin. The picture below of a group of dinosaurs has a variety of patterns on the skin. Create a drawing of an iguana with the patterns below on the skin using different values of light and dark shades from your pencil.

I

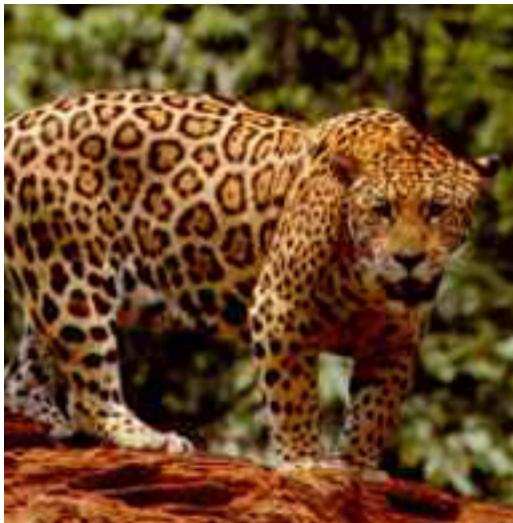

Create a drawing of iguanas that fill the shape of a circle. Do you like the picture above? How many creatures do you see in it? Color the picture with markers.

J

The jaguar on the bottom was created by painting an old record. The one below was created by using oil pastels. Try to duplicate one of these pictures below.

Choose the color of paper that is the background color of the picture.

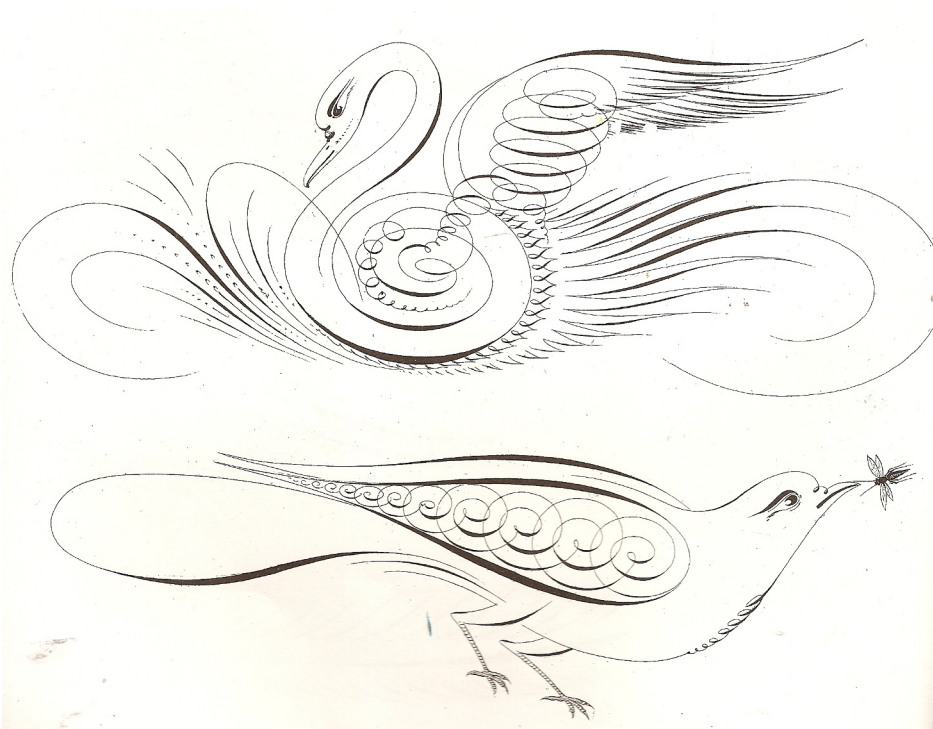

K

Draw the bird on the precious page just using lines as the birds are done below. This is called scrollwork and was quite popular in history. Go to this website to read about it:

<http://en.wikipedia.org/wiki/Scrollwork>

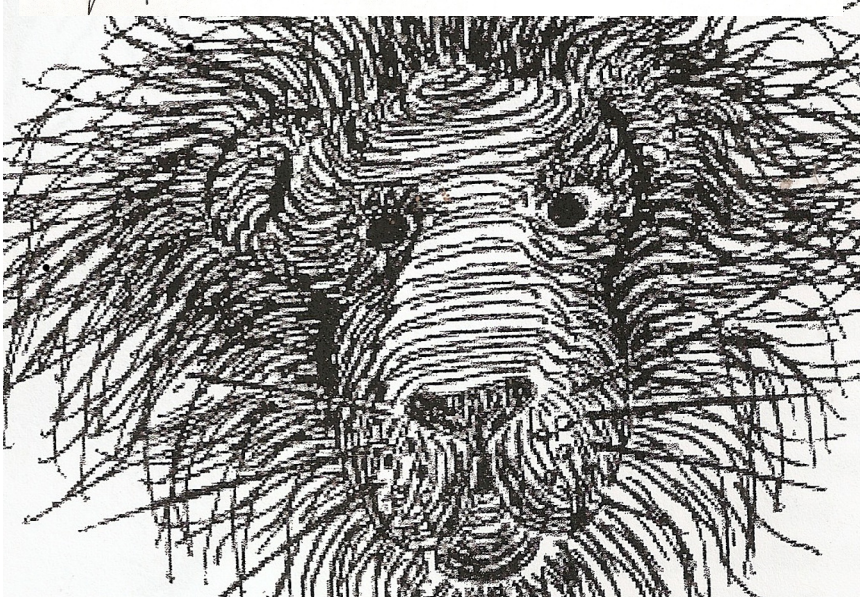

HIS LIONS

L

There are many ways to draw a lion. On the bottom left is a lion made from lines. A line is one of the elements of art. A good way to do a lion is on a brown paper with white chalk and black charcoal. Which lion do you like best on this page?

/Draw a marmoset who
is your favorite pet.
How many words can
you think of that rhyme
with pet? Try to write
them in one sentence
using the word
marmoset.

M

You can create a picture that looks like a stained glass window by drawing the picture and covering it with heavy black lines.

Draw a tree similar to the one on the left and put a monkey hanging in the tree. Notice how the picture below has black lines and bright colors.

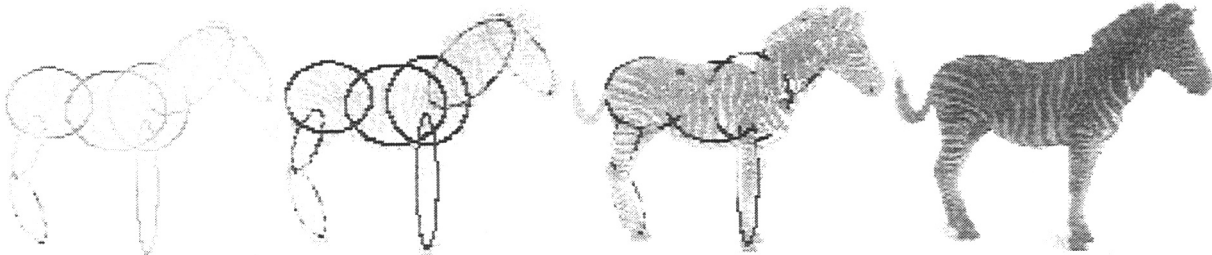

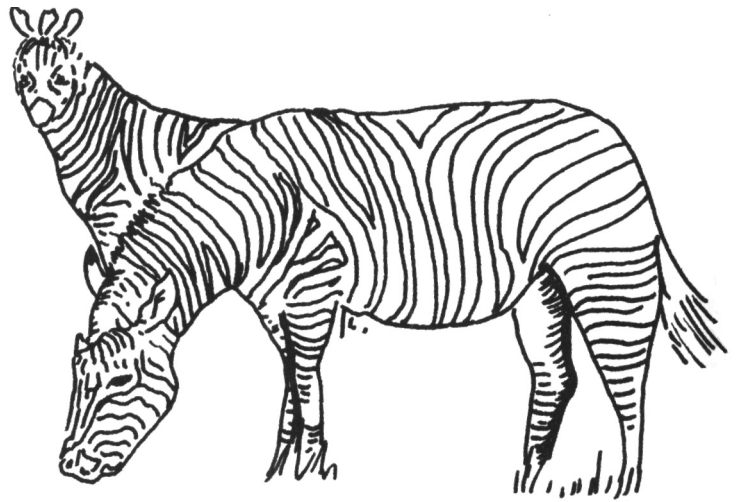

Put a nutria in the center of this
mandala. A pattern is a repeated design.
How many patterns can you create?
Go to this website for instructions on
making a
tessellation:<http://www.tessellations.org/>

N

This animal looks like a zebra. It has black and white stripes. Make the name of the animal in patterns from animals of the rainforest. An example would be the skin of the tree frog, etc.

O

You might find a porpoise or a piranha in a rich tropical garden place like the one below. Draw a pink porpoise coming out of the water.

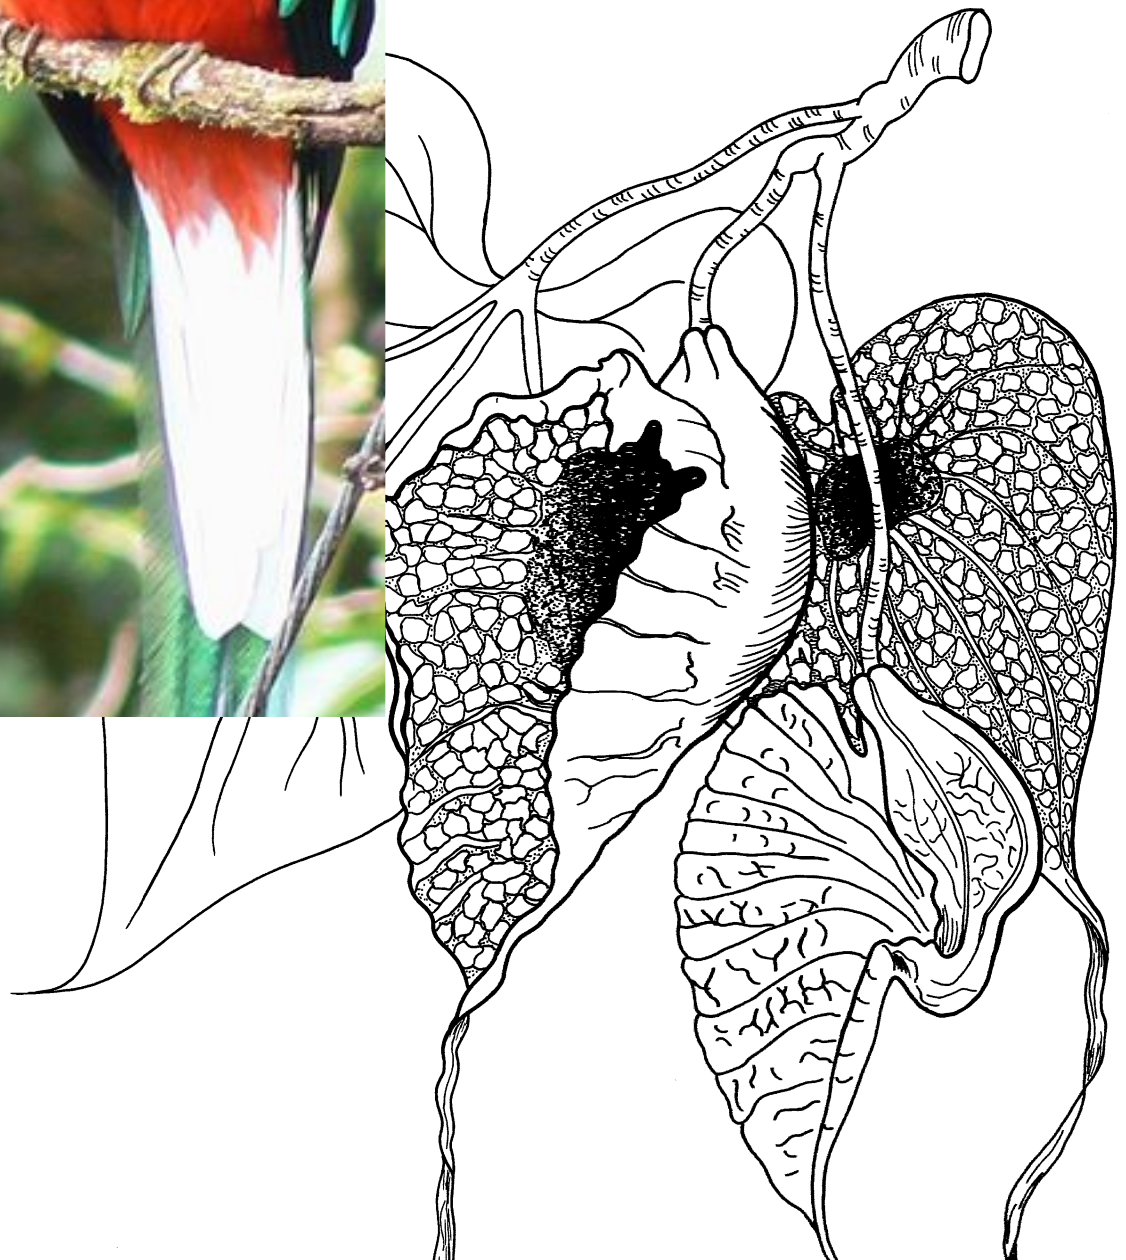

P

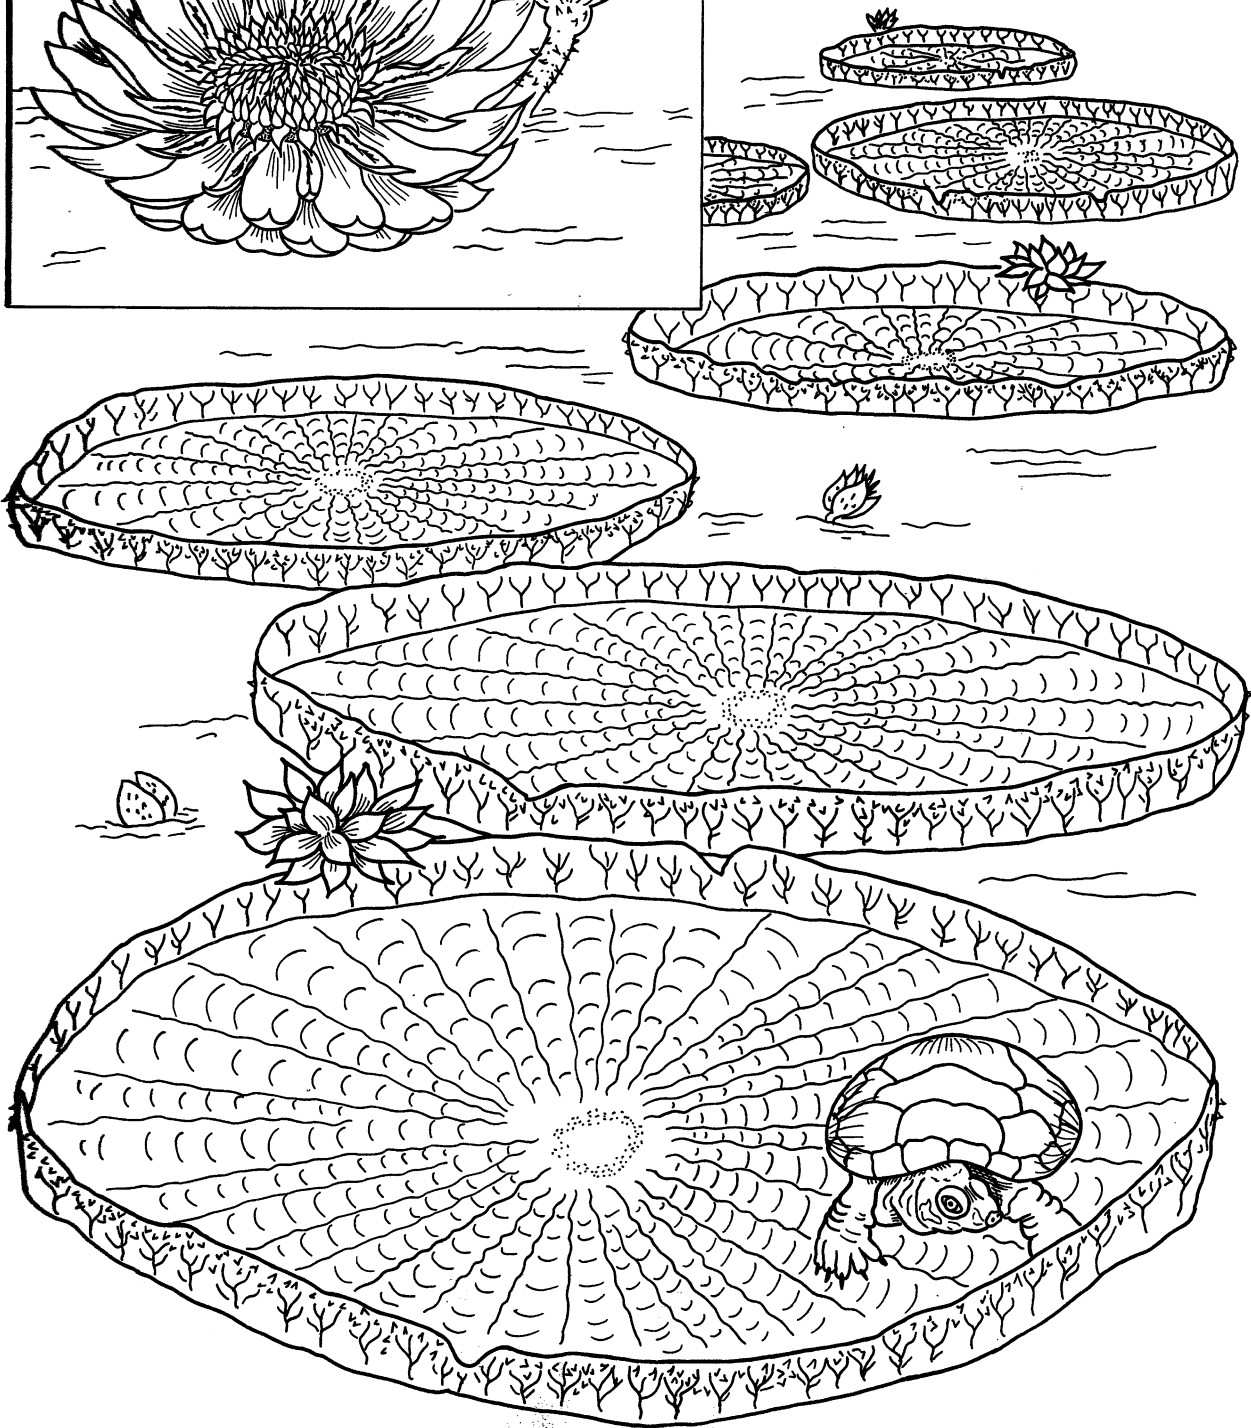

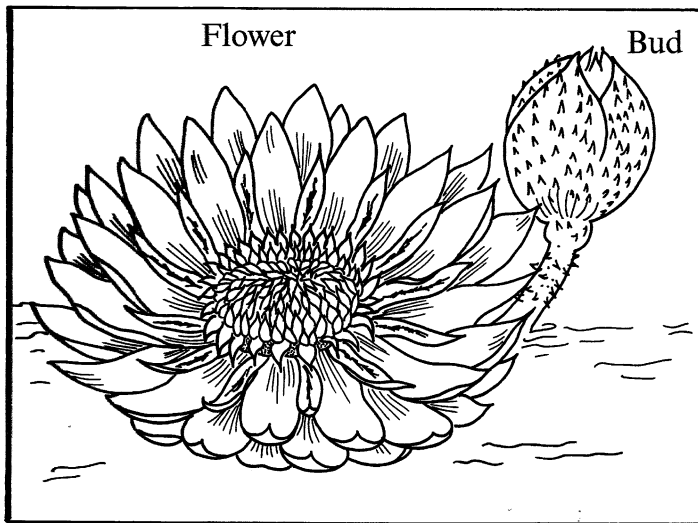

Q

Draw a picture of this quetzal sitting on a pelican flower (pictured below).

R

Draw the red eyed tree frog on this rainforest plant.

Royal Water Lily (*Victoria regia*). These huge aquatic plants grow in Guyana and the Amazon basin. Their circular leaves are three to six feet across, turned up at the edges. Green above and reddish below, the leaves are filled with air spaces, which aid flotation, making them so sturdy they can easily support the weight of an adult. The

white flowers open in the late afternoon, slowly changing to pink and then red by the second day. The flowers are from six to eighteen inches across, and highly fragrant. The turtle illustrated here is the Yellow-spotted Amazon River Turtle (*Podocnemis unifilis*). It can be gray, olive, or brown, with yellow spots on its head and neck.

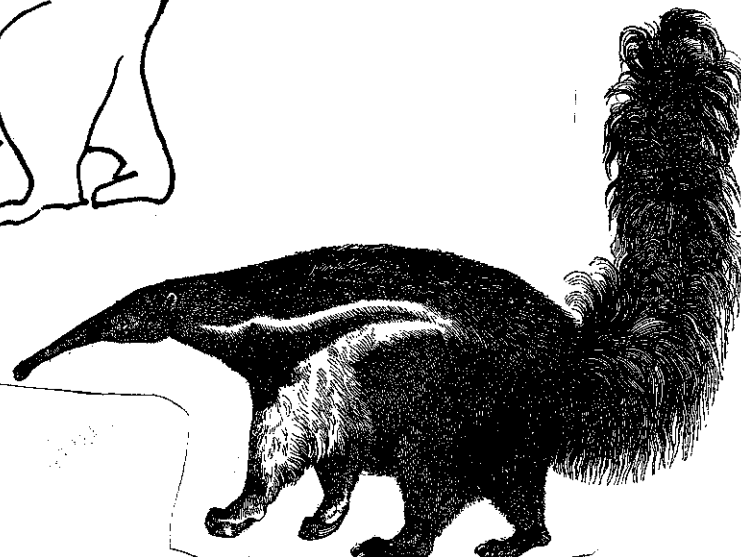

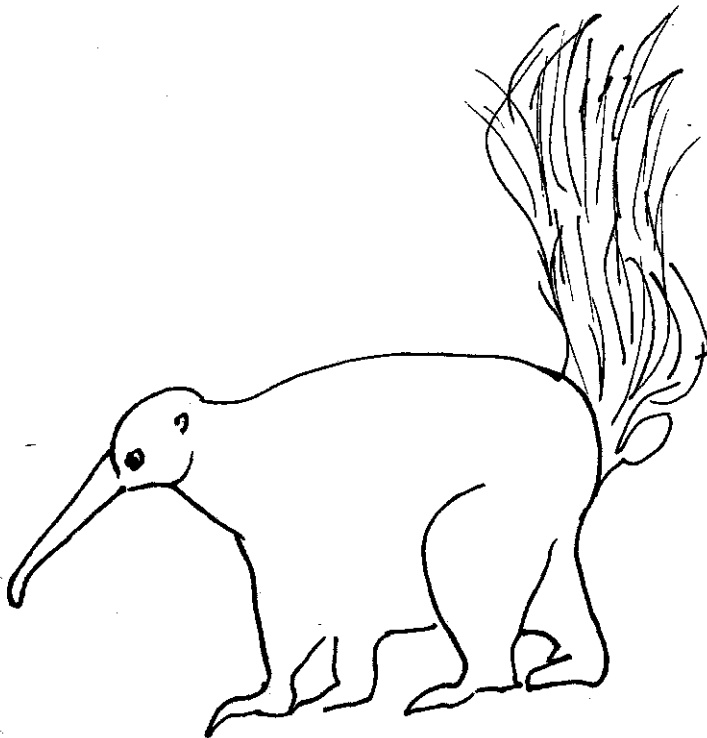

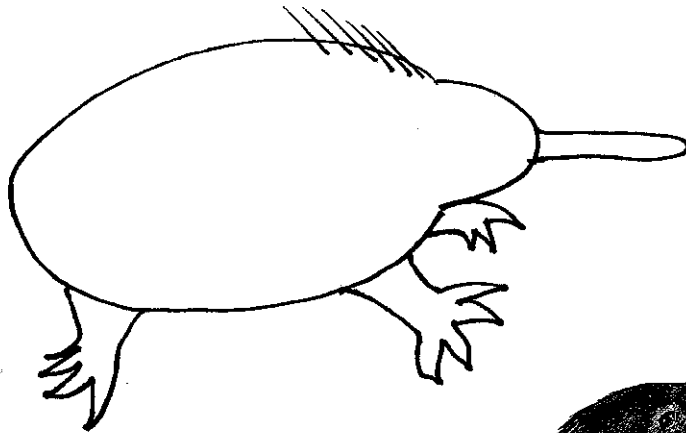

Here is a picture of Syl the sloth. Do you think he looks happy? How do you think he keeps his hat on? This is called a prop in art and when you make a comic picture of an animal you can add clothing that adds to the character. Draw a sloth and make him a doctor, a scientist and then a cook. What props will you use to show this?

S

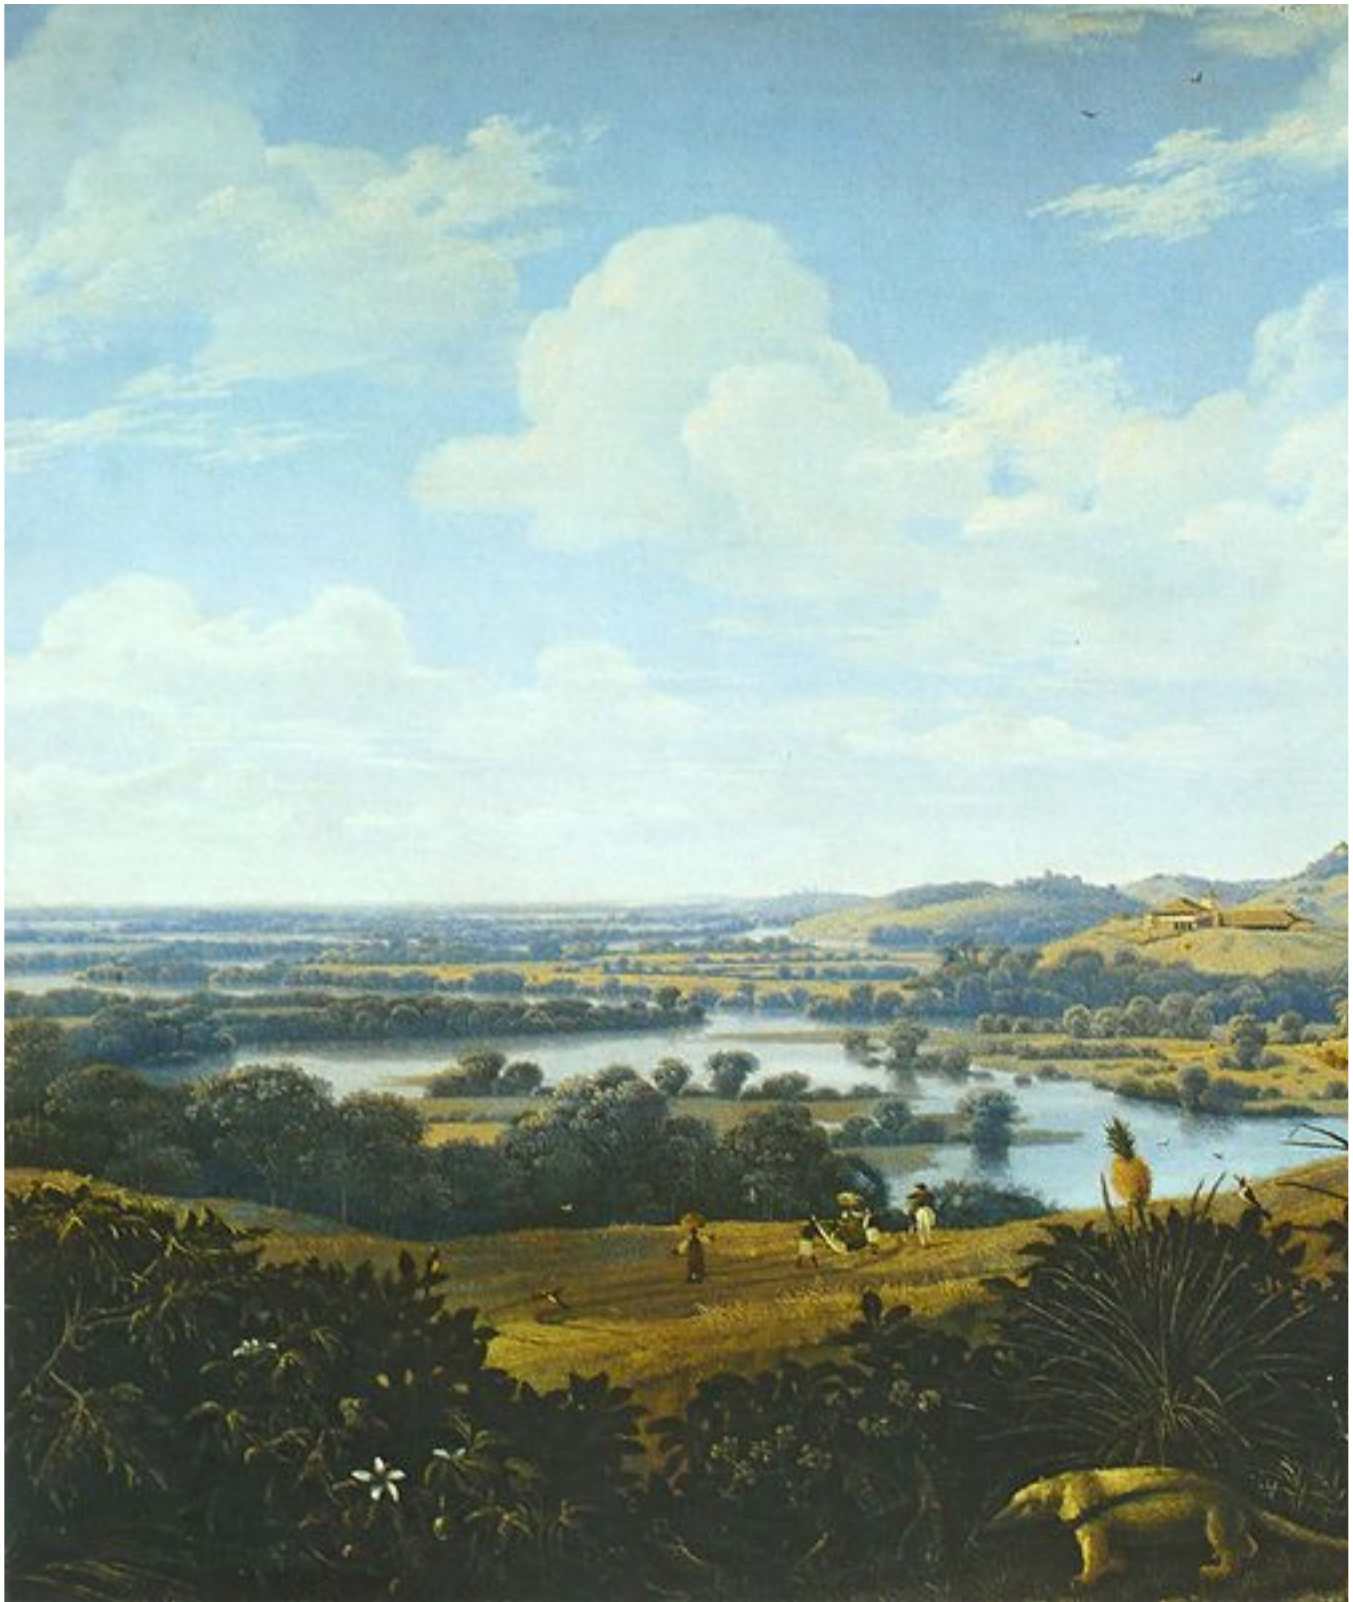

Draw this kind of anteater
using basic shapes and
showing shading, shadow
and texture.

T

/Copy the master painting
on the next page. Put the
anteater in the foreground
of the picture.

Do you see the anteater in the picture above by Frans Post? It is in the foreground or front of the picture. The sky is darker at the top and lighter on the horizon. The foreground colors are darker in the foreground and lighter as you go further away. This is atmospheric perspective.

U

Draw a tree full of these birds. Where does the light fall on each bird? What areas are darker and lighter? Use the basic shapes of circles and ovals and triangles to do your birds.

Caravaggio did the picture on the right of the Medusa. Draw a person with snakes as hair and you have a Medusa. Below you see the skeleton of a viper. Create an animal who is part snake and part _____.

V

Here I am petting a possum at Wonders of Wildlife Museum for a workshop I did. Draw a baby possum like the one below in someone's hand.

W

Did you ever hear of X-ray astronomy? Below is a picture of just that.

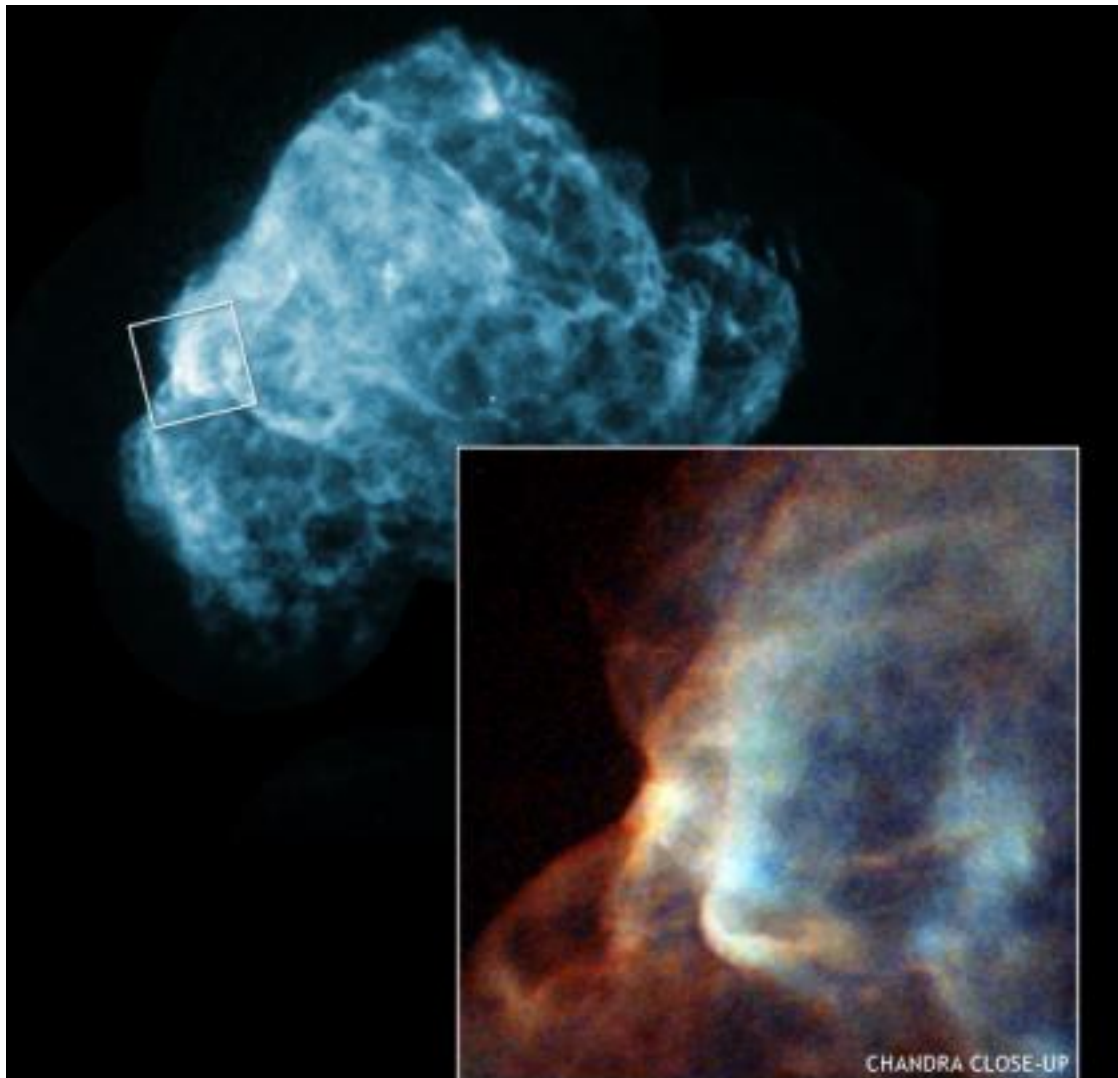

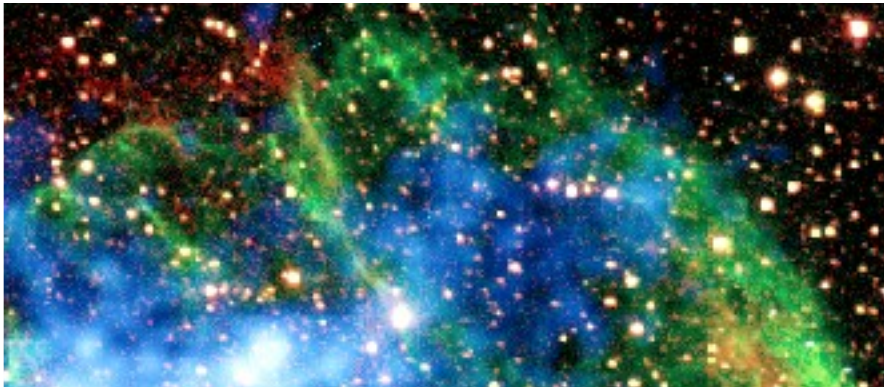

<http://news.nationalgeographic.com/news/2009/02/photogalleries/fish-transparent-head-barreleye-picture/>

Here is a picture of a fish that has a transparent head:

<http://commons.wikimedia.org/wiki/File:SN1572.Companion.jpg>

Draw a constellation in the shape of a fish.

X

Y

Both the frogs above are poison dart frogs. Draw the frog on the right and color him yellow and black. Be sure and put the texture and shading in the picture. What a terrible weapon this would be in the jungle. Research and write a one page paper on whether there is an antidote to this if you are hit with a dart.

Z

Zorro was a famous character in movies and literature. There also is a short eared Zorro in Peru pictured below. Make a poster about the animal below.

It is on the endangered animal list. Remember a poster has a bold and simple design. It is easy to read. Use a ruler and do everything in pencil first so you can be sure to get the design and composition that you want. Go to this website to read all about it before you do your poster:

http://en.wikipedia.org/wiki/Short-eared_Dog

HIS LIONS

IF YOU ARE PRAYING ABOUT WAYS
TO MAKE EXTRA INCOME CALL ME
AT 1-573-453-6364. WE NEED
PEOPLE TO START HIS YOUNG
LIONS CHAPTERS AND ARTSY
ANIMAL CLUBS NATIONWIDE.

We have moved!!! Visual Manna is now located in Kansas City, MO. Our new number is 1-573-453-6364 or 816-318-1907. Do you have any students who are gifted and talented in art? We have a Young Lions program for older students that works towards getting Advanced Placement credit in studio art and also does community service by painting murals in soup kitchens, city halls, churches etc. We also work for business people for a reduced rate to gain entrepreneur experience. Go to visualmanna.com for information. You can scholarship a student for a tax deduction.

We also have our Artsy Animals Program Ready to Market. You get a 2 by 3 foot poster, a tee shirt, markers for fabric, and books and workbooks. We do classes on the internet, go to visualnanna.com for information.
